DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 63-68 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 63-68 are rejected under 35 U.S.C. 102(e) as being anticipated by Frager et al (Frager), U.S. Patent No. 6,018,652.

Regarding claims 63, 65 and 67, Frager discloses receiving means for receiving data related to a communication charge from a first carrier (col. 5, line 65-col. 6, line 23); calculating means for calculating the communication charge for the first carrier in accordance with the data received by said receiving means (col. 6, lines 38-48; switching means for switching from the first carrier to a second carrier during communication in the first carrier (col. 6, line 66-col. 7, line 23) and storing means for storing the communication charge calculated by said calculating means, wherein the communication charge is based on the time until the first carrier is switched to the second carrier after the communication is started (col. 6, lines 38-48).

Regarding claims 64, 66 and 68, Frager discloses wherein said storing means stores communication start time for the second carrier as evidenced by the fact that the system keeps accurate records of when charging rates change for a mobile station that has moved to a new charging area (col. 6, lines 38-48).

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
